SUMMARY

Product Designer who owns systems and surfaces used by 2M+ users and ships designs close to production code. Data-informed and accessibility-first (WCAG AA/AAA) with 3 years of designing SaaS and platform products from problem framing through prototyping, shipping UI, and measuring outcomes.

TECHNICAL SKILLS

DESIGN TOOLS	Figma (Auto Layout, Variables, Tokens), FigJam, Framer, AI-assisted prototyping (Claude, ChatGPT)
RESEARCH	User interviews, problem framing, personas, usability testing, insight synthesis, ideation (Crazy 8s), card sorting, tree testing, heuristic evaluation, survey design
IA & FLOWS	Information architecture, sitemaps, user flows, wireframing, edge-case & state design, interaction logic
PROTOTYPING	Functional interactive flows, Figma prototypes, Framer production builds + code overrides, rapid prototyping
DESIGN SYSTEMS	24-component accessibility-first system, 100+ design tokens, variants, developer handoff
FRONT-END & PERFORMANCE	Framer React/TypeScript overrides, HTML/CSS, Lighthouse / PageSpeed, Core Web Vitals (LCP, TBT, CLS), JSON-LD schema, preloading, WebP
DATA & EXPERIMENT	A/B testing, data-informed decisions, heatmap analysis, CTR & drop-off tracking
ACCESSIBILITY	WCAG AA/AAA, keyboard navigation, ARIA states, portal focus management, alt text, inclusive design
COLLABORATION	Agile, PM partnership, engineering pairing, mentorship (4 juniors), QA, stakeholder management

EXPERIENCE

Deligence Technologies Pvt. Ltd. — Product Designer (Senior, UX/UI)

New Delhi | Oct 2025 – Present

- Owned end-to-end product design for Factile (2M+ users), a Jeopardy-style classroom quiz platform, redesigning onboarding, creation, and customization workflows for educators and older, non-technical users; contributed to 22.5% growth in new paid users.
- Built and own a 29-component (still scaling), 100+ token accessibility-first design system (WCAG AA/AAA).
- Led product design for Vesta, digitizing real estate transactions across seller, buyer, and agent roles: 1,104 screens and 25+ user flows in 6 months; reduced seller onboarding from 23 to 15 steps and streamlined buyer offer creation.

- Rapidly prototype functional, interactive flows (edge cases, states, interaction logic) on a single design system using AI-assisted tooling (Claude).
- Implemented full keyboard navigation for dropdown menus via custom code (focusable triggers, ARIA state, Enter/Escape, tab-through, focus return), solving Framer's portal focus-bridging gap (WCAG AA/AAA).
- Improved page speed and accessibility on the live site — faster mobile/desktop load times plus keyboard-focus and alt-text fixes across flows (WCAG AA/AAA); implemented technical SEO across 20+ pages via code overrides (GTM enablement, JSON-LD structured data) and SEO-conscious microcopy.

SimplePlan Media — UX/UI Designer

New Delhi | Aug 2023 – Oct 2025

- Designed product UX/UI for BundleSuite, a Shopify bundling app (rated 5.0 across 460+ reviews, Built-for-Shopify certified), simplifying complex configuration workflows for storefronts.
- Conducted research and designed wireframes and high-fidelity interfaces (product UI, websites, landing pages, branding) for client products across e-commerce, healthcare, and logistics.
- Built reusable UI patterns and components across projects, maintaining consistency while adapting to different product needs.

EDUCATION

M.Tech, CAD/CAM (Computer-Aided Design & Computer-Aided Manufacturing) — IIITDM Jabalpur (2020 – 2022)

B.Tech, Mechanical Engineering — Cochin University of Science and Technology (2013 – 2017)
